Professional Summary

MCA graduate with hands-on experience in developing full-stack web applications using Python, Django, React.js, JavaScript, and MySQL. Experienced in building REST APIs, responsive user interfaces, and end-to-end web solutions. Strong foundation in Data Structures & Algorithms, Object-Oriented Programming, DBMS, and Software Development. Possess basic knowledge of Generative AI concepts, NLP, and Machine Learning. Seeking an entry-level Python Full Stack Developer role to contribute to scalable and innovative applications.

Technical Skills

Languages: Python, JavaScript, SQL, HTML5, CSS3

Frontend: React.js, Bootstrap, Tailwind CSS

Backend: Django, Django REST Framework, REST APIs

Databases: MySQL, SQLite

CS Fundamentals: Data Structures & Algorithms (DSA), OOP, DBMS

Tools: Git, GitHub, VS Code

Projects

Automated Resume Screening using NLP (Internship)

- Developed a full-stack web application using Python, Django, SQLite, HTML, CSS, and JavaScript.
- Implemented NLP techniques including SBERT and cosine similarity for resume-job matching.
- Built REST-based workflows and role-based authentication for Admin and User modules.
- Trained ML models on 18,000+ records and achieved F1-scores above 0.85.
- Designed end-to-end pipelines for preprocessing, training, and real-time prediction.

Offensive Language Detection on Social Media using NLP

- Built a Django-based full-stack application for offensive language detection.
- Applied TF-IDF vectorization and multiple machine learning algorithms for classification.
- Developed responsive frontend pages and integrated backend prediction APIs.
- Implemented user/admin modules, dataset management, and real-time prediction features.
- Evaluated models on 13,000+ labeled tweets with strong classification performance.

Education

Master of Computer Applications (MCA) | Aurora's PG College | 2023–2025 | 70.03%

Certificates

Full Stack – Python Developer | IHUB Innovative Placement Solutions
